## PUBLIC NOTICE

### Regarding Modifications to the Tacoma Facility RCRA Part B Permit

DATE October 6, 2003 Burlington Environmental Inc., a wholly owned subsidiary of Philip Services Corporation (PSC), has modified the RCRA Part B Operating Permit for its Tacoma facility. In accordance with Washington State Dangerous Waste Regulations Chapter 173-303-830 WAC. These changes are classified as Class 1 modifications, under the three tiered modification system established by federal and state regulations. Of the three classes of modifications, Class 1 modifications are the most minor and do not substantially affect facility operations.

### General Facility Operations

PSC's Tacoma facility, located at 1701 East Alexander Ave. Tacoma WA 98421, is a commercial dangerous waste management facility. Treatment processes include treatment of dangerous wastes, wastewater treatment, and stabilization. There is no disposal of dangerous wastes on site.

### Summary of the Modifications

TACMOD16-1: This Class 1 modification proposes the continued use of Storage/Processing Tank 250. Modification TACMOD15-2 called out for the closure and removal of Tank 250 to allow for the installation and operation of Tank 1215. The installation and operation of Tank 1215 has been put on hold.

The Part B Permit, the modifications presented above, and supporting documentation can be reviewed at:
